PROFILE

Full Stack Developer with approximately 1.7 years of experience building and maintaining production web applications using Python, Django, Django REST Framework, Vue.js, and Quasar Framework. Delivered 10+ RESTful APIs, optimized MySQL and PostgreSQL schemas, and resolved 30+ production bugs. Experienced in end-to-end feature delivery for a multi-module Property Management System covering tenant billing, security deposits, owner disbursements, task scheduling, and reserve fund management. Skilled in Agile development, Git/CI-CD workflows, and cross-functional collaboration.

PROFESSIONAL EXPERIENCE

InfiniTechX Technologies Pvt Ltd **Feb 2025 – Present**
Full Stack Developer Trichy, Tamil Nadu

- Delivered end-to-end features across a Django REST Framework backend and Vue.js 3 / Quasar frontend for a production Property Management System, supporting system reliability and on-time releases.
- Built and maintained 10+ RESTful APIs in Python and Django, reducing backend response latency by 25% through query optimization and efficient serializer design.
- Developed responsive, reusable UI components in Vue.js and Quasar, improving frontend rendering performance and page responsiveness by 20–30%.
- Designed and optimized MySQL and PostgreSQL schemas, improving query efficiency by up to 40% through indexing, normalization, and tuning.
- Diagnosed and resolved critical payment-pipeline defects, including a security-deposit invoice bug that incorrectly marked unrelated rent invoices as paid, restoring billing accuracy across the platform.
- Stabilized the Django-Q background task queue by resolving table case-sensitivity conflicts, orphaned task references, and worker/retry misconfigurations, eliminating recurring job failures.
- Integrated Stripe payment processing for secure online transactions, reducing payment-related errors by 15%.
- Implemented JWT-based authentication, strengthening application security and reducing unauthorized access risk by 90%.
- Identified and resolved 30+ bugs across frontend and backend modules, reducing production issues by 40%.
- Deployed application updates to a cloud platform using Git-based CI/CD workflows, maintaining 99% uptime for live demonstrations and stakeholder reviews.

Tools & Techniques: Python, Django, Django REST Framework, Django-Q, Vue.js 3, Quasar Framework, MySQL, PostgreSQL, Stripe, JWT, Git, GitHub, CI/CD, Postman, Agile/Scrum, Query Optimization, Root-Cause Analysis.

PROJECTS

Property Management System (PMS) **Feb 2025 – Present**
Tools: *Python, Django, Django REST Framework, Vue.js 3, Quasar Framework, MySQL/PostgreSQL, Django-Q*

- Architected a full-stack property management platform automating tenant tracking, rent collection, and maintenance workflows, improving overall process efficiency by 60%.
- Built tenant and lease management modules enabling 100% digital lease records and cutting manual paperwork by 80%.
- Developed rent tracking and financial reporting dashboards with data visualizations, reducing manual calculation time by 50%.
- Designed a security-deposit-first payment gate and a disbursement summary UI in Vue.js/Quasar, including lazy-loaded, per-invoice reserve-fund and refill calculations.
- Built a maintenance request portal with real-time ticket status updates, increasing issue resolution speed by 30%.

- Redesigned the Reserve Fund module (owner list and property detail views) to new UI specifications while preserving existing business logic and API contracts.

Multi-Banking Secured System with Single Access **Mar 2024 – Present**
Tools: *HTML, CSS, JavaScript, Bootstrap, Java, MySQL*

- Designed and developed a responsive multi-bank access portal allowing users to view accounts across banks through a single login, with admin-monitored operations.
- Implemented secure email-based password recovery and customization through backend APIs, improving account-recovery usability and security.

EDUCATION

M.Sc. Computer Science (77%) **Jun 2021 – Jun 2023**
Bishop Heber College, Trichy

B.Sc. Computer Science (78%) **Jun 2018 – Jun 2021**
Bishop Heber College, Trichy

VERSION CONTROL

- Git and GitHub for source control: branching, pull requests, code reviews, and merge conflict resolution.
- Git-based CI/CD workflows for deploying application updates to a cloud platform.

PROJECT TOOLS

- Postman for API testing and debugging; Django-Q for background task scheduling; Stripe for payment integration.
- Agile/Scrum practices for sprint-based delivery and cross-functional collaboration.

CERTIFICATIONS & ACHIEVEMENTS

- Java Full Stack Development – Softlogic Institute (Mar 2024 – Present)
- Java Fundamentals – IBM Developer Skills Network / IBMCE (Jul 2024 – Present)
- Gold Medal, university-level athletics meet; Bronze Medal, state-level athletics meet.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, Java, C++, C, HTML5, CSS3

Developer Tools: Git, GitHub, Postman, CI/CD pipelines

Frameworks: Django, Django REST Framework, Spring Boot, Vue.js 3, Quasar Framework, React.js, Bootstrap

Libraries: Django-Q, Stripe SDK, JWT

Technologies: RESTful API Design, JWT Authentication, Stripe Payment Integration, MVC Architecture, Task Scheduling (Django-Q/Cron), Responsive Web Design, Agile/Scrum

Database & Retrieval: MySQL, PostgreSQL, Database Schema Design, Query Optimization, Indexing, Normalization

API & Backend: RESTful APIs, DRF Serializers, JWT-based Authentication, Background Task Queues, Payment Pipelines, Debugging & Root-Cause Analysis
